

POCT Urinalysis: Rapid Window to Patient Health

In-office clinical benefits:

- Convenient, reliable screening
- Aids diagnosis
- Monitor & evaluate treatment
- No loss to follow-up

In-office testing allows physicians to consult with patients and determine next steps all in one visit.

Screening At-Risk Groups Leads to Early Identification

Diabetes

Chronic Kidney Disease

Heart Disease

Liver Disease

Urinary Tract Infections

Pregnancy

Screening to Improve Health Equity

Social determinants of health lead to healthcare disparities.

Race/ethnicity plays a role in health and diagnosis.

Urinalysis is a rapid and cost-effective way to screen for diabetes, kidney disease, heart disease, liver disease, and other conditions in those most affected by healthcare disparities.

Connectivity With Analyzers Improves Performance

Remove subjectivity

Reduce test time

Eliminate transcription errors

Improve documentation

POCT Urinalysis Analyzers Are Beneficial to Current Users
